UTAC Engages INSIDE Secure As New Smart Card Customer For Indonesia Facility

Singapore, 31 August 2015 –UTAC Holdings Ltd (UTAC), a Singapore-based semiconductor testing and assembly services provider, today announced that it has engaged INSIDE Secure as a new customer for smart cards module test and assembly in its Indonesia facility.

“We are honored that INSIDE Secure has selected UTAC as a partner for its smart card modules. INSIDE Secure is a major player in embedded security solutions for mobile devices and we look forward to supporting them out of our Indonesia facility which has a long track record in providing assembly and test for RFID smart cards to the Japanese market. We acquired the Indonesia plant from Panasonic last year and will continue to execute on our strategy to backfill the plant with new customers,” said Dr. John Nelson, CEO of UTAC.

UTAC has acquired assembly and test capacity to provide turnkey services for contact and contactless smart cards modules in Indonesia to support INSIDE Secure. Production is commencing in FY2015 but revenue contribution is not expected to be material until FY2016.

“INSIDE Secure welcomes the opportunity to extend our 7 year partnership with UTAC to include smart cards module test and assembly,” said Mr Pierre Garnier, Chief Operating Officer of INSIDE Secure. *“The formation of this relationship reinforces INSIDE Secure’s practice of dual-sourcing its modules, a practice that we’ll carry with us in our emerging businesses to provide security for the Internet of Things, and for anti-counterfeiting and brand protection.”*

Demand for security smartcards and RFID continues to grow in application such as telecommunication, driver’s license, national and cross border identification and bank cards. The global market for smart cards is expected to grow at 9.0% CAGR from 2014 to US\$11.9 billion by 2020 according to a market report published by Transparency Market Research on 4 December 2014.

About INSIDE Secure

INSIDE Secure (Euronext Paris FR0010291245 – INSD) provides comprehensive embedded security solutions. World-leading companies rely on INSIDE Secure's mobile security and secure transaction offerings to protect critical assets including connected devices, content, services, identity and transactions. Unmatched security expertise combined with a comprehensive range of IP, semiconductors, software and associated services gives INSIDE Secure customers a single source for advanced solutions and superior investment protection.
